**Flight Simulation Technique Centre Pvt. Ltd.**

**"Train in India"**

## ABOUT US

FSTC is the most advanced full flight simulator training company in the market today. We are business people & pilots – people who are enthusiastic about flying & Flying Training. We are a private company, owned by aviators committed to building a long- term future of aviation enthusiasts.

We are India's first standalone Approved Training Organization (ATO) by Directorate General of Civil Aviation, India (DGCA) and also the only approved ATO by European Aviation Safety Agency (EASA) in India, with most number of simulator types to fulfill the requirement of majority of the airline in India & the Region. Also, FSTC is proud to extend satisfactory training to Indian Air Force and Indian Navy for their VVIP batches.

At FSTC, quality is a given. The centre is architecture to meet global standards of excellence offering integrated training solutions and services to Commercial Airlines and individual pilots.

As aviators, we always ask ourselves if there is a better way. And very often there is. Thus, instead of a cotemporary path, we allow our instructors to be innovative in imparting training and keep a regular check on the standards. The Smart and state of the art simulators ensure realist training at less cost but much more effective. As an innovative simulator training company, we create new approaches that make simulators training more realistic, more reliable, easier to reach, and more economical. All this benefits the user many ways.

One of our focus areas is opting for quality devices. For some it is an afterthought; to us, it is a key to success. FSTC has two brand new A320 , two B737 & one ATR 72-500 Full Flight level "D" Simulators. Advance feature of these simulators are extremely safe, reliable and noiseless.

The visual system is superb, which provides wide-angle imagery of stunning clarity at optical infinity.

This reduces the maintenance required, making what remains easier to do, and minimizing the potential for unplanned downtime. This all help make operations more economical for our users. FSTC builds self-testing and self-monitoring into our systems, so that maintenance is preventative rather than reactive. That means much less unexpected downtime and more satisfied customers.

## YOUR PARTNER

We prepare airline pilots and we are fully focused on your needs. Your requirements are always our first priority. We're in the business of listening to you, optimizing our simulators training requirements simpler, seamless and more economical. Whether in imparting you choice of your simulator training or integrating training curriculum to your needs, FSTC is there for you.
